TECHNICAL SKILLS

- Programming Languages: C, Java
- Web technologies : Node.js, Express.js, React.js
- Database: MySQL

AREA OF INTEREST

- Digital Electronics
- Electrical Machines

PROJECTS

Wi-fi based smart digital notice board |Raspberry Pi |HTML/CSS/JavaScript | Aug 2025

- Developed a Wi-Fi enabled digital notice board that allows remote updating of messages and images through a web interface without manual intervention.
- Designed a dynamic frontend using HTML, CSS, and JavaScript with MongoDB backend integration to store, retrieve, and display notices in real time.

Forest Time-Loop Adventure Game | React.js | Three.js | Node.js | MongoDB | Jan 2026

- Built an interactive 3D forest adventure game using React.js and Three.js with animated environments and player-controlled navigation.
- Implemented time-loop based game logic and integrated a Node.js, Express.js, and MongoDB backend to manage player progress, scores, and level resets.

Emergency QR Medical System | React.js | Node.js | MongoDB | Jan 2026

- Built a full-stack QR-based emergency information system allowing instant access to patient data via a scanned QR code.
- Deployed a React frontend on Netlify and a Node.js backend on Render, using MongoDB Atlas for secure data persistence.

LEADERSHIPS

Placement Coordinator (2024–Present) – coordinated placement activities.

CERTIFICATION

Completed an Autodesk Authorized course in AutoCAD Electrical Design (AutoCAD Electrical 2023).

EDUCATION

- 2023-2027|KONGU ENGINEERING COLLEGE CGPA: 8.04
Bachelor of Engineering-Electrical and Electronics Engineering
- 2023|C.K.K.Matriculation Higher Secondary School Percentage: 88.67
BIO MATHS
